FLOWMETER SKID - AQ6800C
CI KINABALU
FLOWMETER SKID - AQ6800C

This Chemical Injection Flowmeter Skid, Injection Rate Control Device (IRCD), is the smallest of the 3 skids but is probably also the most demanding of the 3 packages.

MAJOR COMPONENTS

- 6 POSITIVE DISPLACEMENT FLOWMETERS
  - Flow rate at 1.3LpH
- SYSTEM OPERATES AT 750 BAR
- 6 IRCDs (INJECTION RATE CONTROL DEVICE)
  - To regulate flow between 0.7LPH to 2LPH approximately
- VALVES AND FITTINGS
- HIGH PRESSURE FILTER
Rotary Piston/ Oscillating Piston type flow meter with a single moving part provides robust and low maintenance technology.

Suitable for low & high viscosity liquids at pressure rating up to 4,000 bar (60,000 psi).

Connections: NPT, Autoclave, ANSI flanges, Grayloc Hubs, Galperti Hubs, Techlok hubs etc

Communications: 4-20mA HART, Pulse, MODBUS, Foundation Field bus. Dependent on electronics and certification requirements.

Temperature rating: -40°C - 100°C with remote mounted electronics. For direct mount versions see next page. Higher temperature special versions available on request.

A 40 micron filter or less is recommended.
Internals:
Constructed of either Nitronic-60 (anti-galling) or Titanium for the LF03, LF05 & LF15 size to achieve the lowest flow and widest turndown possible. Chambers and rotors are PVD coated. Coatings are applied by physical vapour deposition. A hard metal chromium nitride base layer provides surface hardness and appropriate support for the carbon (WC/C) which is laid over. The WC/C coating provides excellent protection against adhesive wear and its low coefficient of friction reduces the risk of surface fatigue (pitting) and fretting corrosion, vastly improving turndown and low flow capability.
